# Quality certificates at BRAND

## Certificates for Liquid Handling instruments and volumetric instruments

All BLAUBRAND® volumetric instruments (Class A), Class A plastic volumetric instruments, and Liquid Handling instruments for volume measurement are supplied with a certificate. This reduces both the cost of your initial assessment and the monitoring of measuring instruments. The data can be easily transferred from the certificate. BRAND lists all measuring instruments used and the date of issue on each certificate. Each certificate also includes the Declaration of Conformity in accordance with the German Weights and Measures Act and its regulations. Either a batch number (batch certificate) or a serial number (individual certificate) is printed on the certificate and on the instrument.

e.g. BLAUBRAND® batch certificate

## USP individual certificate

Companies that manufacture pharmaceutical products for the American market and are therefore audited by US authorities, e.g. the FDA (Food and Drug Administration), are required to comply with the requirements of the USP (United States Pharmacopeia). BLAUBRAND® USP volumetric instruments comply with the Class A error limits required by the USP. There is no such regulation for liquid handling devices.

For selected BLAUBRAND® volumetric instruments, we confirm the required volume error limits with a batch certificate and upon request, with an individual certificate. The error limit and the USP characters are printed on the measuring instrument.

## DAkkS calibration certificate

As an official certificate, the DAkkS calibration certificate documents the traceability of the measured values to national and international standards such as, among others, to the DIN EN ISO 9001 and DIN EN ISO/IEC 17025 standards required for the monitoring of measuring instruments. More information see page 9.

For ordering volumetric instruments with DAkkS calibration certificate, add "DAkkS" as a prefix to the catalog number. To obtain a DAkkS calibration certificate for volumetric instruments already in use (regardless of their make), send the instruments to BRAND marked with the note "Calibration DAkkS-accredited (ISO 17025)". The order form is available for download from [www.brand.de/service](http://www.brand.de/service)

A major difference between works calibration services and DAkkS laboratories is the accurate determination of the respective uncertainty of measurement guaranteed by the accredited laboratory and supervised by the DAkkS.

## DAkkS calibration certificate

The DAkkS calibration certificate documents officially the traceability of measuring results to national and international standards as required by the standards DIN EN ISO 9001 and DIN EN ISO/IEC 17025 for the monitoring of measuring instruments.

## When is a DAkkS calibration certificate necessary?

DAkkS calibration certificates are appropriate in uses in which calibrations of an accredited laboratory are requested, where high level calibrations are demanded and for calibration of reference standards and instruments for comparative measurements.

# Maintenance and calibration service for your Liquid Handling instruments

Instruments used for control, inspection, measuring and testing require written protocols for routine testing and calibration. A testing schedule and an inspection and testing procedure must be defined. Documentation is required of the Accuracy and Coefficient of Variation testing that is performed.

Frequent testing can become time consuming and expensive. Measuring instruments must be taken out of service and may have to be adjusted or repaired.

BRAND offers full calibration service including instrument adjustment and repair. This reduces service downtime and saves money.

## BRAND calibration service is available for:

- + Bottle-top dispensers
- + Digital bottle-top burettes
- + Piston-operated pipettes (single and multichannel)
- + Repetitive pipettes (Stepper)

## Testing according to DIN EN ISO 8655

At BRAND, a team of qualified personnel in temperature and humidity controlled rooms using the most modern balances and calibration software, calibrate liquid handling instruments, regardless of their make, according to DIN EN ISO 8655.

Instruments with adjustable volumes such as Transferpette® microliter pipette or the Dispensette® bottle-top dispenser are tested at nominal volume, and at 50% and 10% of nominal volume.

Results of the calibration are documented with a detailed calibration certificate, which meets the requirements of many different testing procedures.

## BRAND Calibration Service

- + Calibration and adjustment of liquid handling instruments regardless of their make (BRAND instruments can be maintained and repaired if necessary).
- + Detailed calibration certificate works calibration certificate or DAkkS calibration certificate
- + Upon request, we will issue an additional certificate that documents the metrological status of the instruments you send in for adjustment/maintenance/repair.
- + Cost-efficient handling

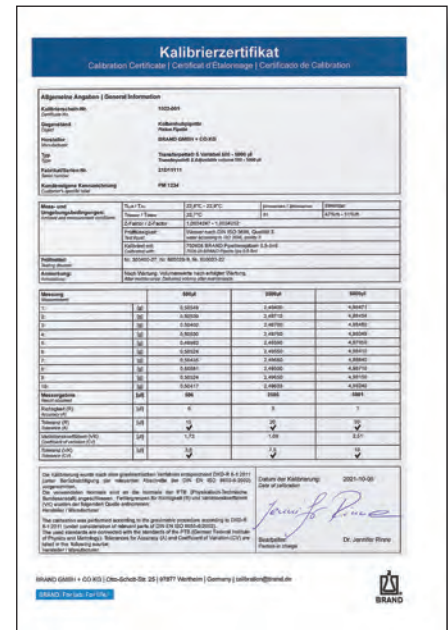

Calibration order forms and declaration on the absence of health hazards are available for download from the Internet at [www.brand.de/service](http://www.brand.de/service).
